

In the Abstract

Kindly replace the Abstract with the following:

~~The present invention relates to a~~A process for the secure distribution of compressed digital texts formed by blocks of binary data stemming from digital transformations applied to an original text, and ~~comprises~~including two stages: ~~[[A]]~~a preparatory stage ~~consisting~~including modifying at least one binary data in one of the~~[[se]]~~ blocks according to at least one substitution operation ~~consisting of the~~including extraction of ~~this~~the binary data in a block and its replacement by a decoy, and a transmission stage of a modified compressed digital text ~~(5)~~ in conformity with the format of the original text, constituted ~~[[by]]~~of blocks modified during the course of the preparatory stage, and by a separate path of ~~this~~the modified compressed digital text ~~(5)~~, of digital complementary information (4) permitting ~~the~~ reconstitution of the original compressed digital text ~~(1)~~ on the equipment of the addressee from ~~this~~the modified compressed digital text ~~(5)~~ and from ~~this~~the complementary information ~~(4)~~.

~~The present invention also concerns a system for carrying out this process.~~
